DETAILED ACTION

The examiner acknowledges applicants' election of Group II claims 10-30 drawn to ceramic pastes, classified in class501, subclass 53 for prosecution with the reserve right to file a divisional application.

This application contains claims 1-2 and 11-47 are drawn to an invention non-elected that has not been made with traverse in Paper No. 13 dated November 06, 2002. A complete reply to the final rejection must include cancellation of non-elected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

An action on the merits has not been made based on any prior art in that the scope and clarity of the instant claims has not been established.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claim 3-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 (and its dependent claims) is indefinite and confusing for the phrase "ceramic paste used for a method of forming ceramic capillary ribs" according to claims 1 or 2" because it merely recites a use without any active, positive steps delimiting how this use is practiced.

Claim 3 (and its dependent claims) is confusing and unclear for being improperly dependent on claim 1 or 2.

Application/Control Number: 09/240,858

Art Unit: 1714

Also, claim 3 is further indefinite and confusing for line 2 phrase "wherein the step of forming the paste" which appears to contradict line 1 of the said claim that the said claim is directed to a ceramic paste and is not directed to a process for producing said ceramic paste. Clarification to the record is requested as to the scope of the said claim is requested.

Claim 4 is further indefinite and confusing for line 1 phrase "wherein said resin is comprises" because it is unclear what is intended.

Claim 9 is indefinite and confusing for line 2 phrase "comprises one of a plurality of kinds of solvents having boiling points which are different" because it is unclear if applicants intend for there to be a single solvent or a plurality of solvents. If applicants intend the solvent to be a plurality of solvents then the claim appear to would be in conflict with claim 3 requiring the present of a solvent. Clarification to the record is requested as to the scope of the instant claims.

Claim 3 (and its dependent claims 4-10) provides for the use of ceramic paste for a method of forming ceramic capillary ribs claims 1 or 2), but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 3 (and its dependent claims 4-10) is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153
